4 Courses

Introduction to Data Engineering

Source Systems, Data Ingestion, and Pipelines

Data Storage and Queries

Data Modeling, Transformation, and Serving

Jan 16, 2026

ABDUL SUKUR MOHAMAD SAMRUK

has successfully completed the online Professional Certificate

DeepLearning.AI Data Engineering

Congratulations on completing all 4 courses of the Data Engineering Professional Certificate program! As part of this program, you've developed a mental framework for thinking like a data engineer. You learned how to translate stakeholder needs into system requirements, design data architecture that meets those requirements, and build effective data pipelines on the AWS cloud. These skills are critical for building data engineering solutions that provide value to organizations in any industry, and acquiring and deploying them will make you more in-demand as a data engineer. We are thrilled that you chose to learn with us and excited to see your career in data grow!

Joe Reis
Author, Data Engineer, "Recovering Data Scientist"

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
